

**Abstract of the Disclosure**

The invention relates to new polymerizable, luminescent compounds of formula I

10 wherein R<sup>1</sup>, R<sup>2</sup>, Q and L<sup>1</sup> have the meanings given in claim 1. Furthermore the invention relates to polymerizable mixtures containing compounds according to the invention and preferably at least one polymerizable mesogenic compound. Polymer materials obtainable by polymerizing such mixtures are also described. These compounds, mixtures and materials

15 show advantageous photoluminescent and/or electroluminescent properties and may be used in light emitting devices and optical- or electrooptical display elements.
